Done. It should update on the live Web site in 2-3 minutes.

Suggest clearing your browser's cache to make sure the updated version downloads correctly.

The original file sent yesterday had a corrupt CAS# for Potassium. The attached file is a corrected file.

The attached data file has been reviewed by the HQ EU and is now approved for coordination with regional PIO and final posting.

Kathie: Do you have some supplemental sample location information that you can provide for this data set that can be posted. Something similar to previous posting messaging.
